FROM THE COMMODORE:

I want to share with our membership a message received via our Corps project liaison Butch Rister:

Good afternoon, I wanted to provide a quick update on the Piasa Project. We have awarded the dredging contract, and the contractor will be mobilizing in the next couple weeks. Their initial focus will be fusing dredge pipe on land. The contractor is looking at options for placement of their office trailer and a place to build pipe.

Once dredging begins, the contractor anticipates working 24 hours/day 4 days per week (Mon – Thurs). They are targeting mid-April to begin dredging. The contractor has until January to complete the work on this Task Order. The flex pipe will be marked with lights for safety purposes. All portions of the river, side channel, and Piasa Creek will remain open to the public during construction. With that said, the flex pipe may create some pockets that are inaccessible to the public. Dredging priorities include the side channel near the downstream end of Piasa Island as well as the backwater on the interior of Piasa Island. Overall dredging will occur from downstream to upstream. Let me know if you have any questions or concerns. Thanks for your support!
